

### **Statement regarding the Regulation (EC) No 1907/2006 (REACH)**

Dear Sir or Madam,

REACH stands for “Registration, Evaluation, Authorisation and Restriction of Chemicals” and came into force on June 1<sup>st</sup>, 2007. REACH is a regulation enacted by the European Union with the objective to improve the protection of human health and environment against risks that can emanate from chemicals.

R+W Antriebselemente GmbH is neither producer nor importer of substances or mixtures as defined under the REACH-Regulation. According to Article 3 of the REACH-Regulation R+W Antriebselemente GmbH produces articles. Articles do not fall within the scope of the REACH-Regulation and are not subject to registration.

With regard to the communication according to Article 33 of the REACH-Regulation we can determine that our supplied products as well as the packaging are not subject to the duty to notify and report of substances of very high concern (SVHC) according to Annex XIV: REACH Authorization List of the REACH-Regulation. The candidate list is dynamically expanding, so we can only refer to the currently listed 197 substances (last update on January 15<sup>th</sup>, 2019).

In case of queries please contact us by phone: +49 9372 9864-0 | email: [info@rw-kupplungen.de](mailto:info@rw-kupplungen.de)

Kind regards

R+W Antriebselemente GmbH
